

**McGill University**  
**Department of Natural Resource Sciences**  
**Assistant Professor in Fish and Wildlife Biology**

The Department of Natural Resource Sciences of McGill University invites applications for a tenure-track position in Fish and Wildlife Biology at the Assistant or Associate Professor level. We are seeking an innovative field biologist with expertise in quantitative methods and the ability to link fundamental research to applied issues in fisheries science, wildlife management and/or conservation biology. Research areas of interest include movement ecology, bioenergetics, population dynamics, trophic interactions, and food webs. Research that includes social and policy dimensions with a geographical focus on the North is desirable.

The successful applicant will hold a PhD degree in an appropriate discipline and will have post-doctoral experience and a record of publication in high-quality scholarly journals. The position will require the development of a strong externally-funded research program involving the mentoring of graduate and undergraduate students. It will involve teaching courses at the undergraduate and graduate levels, as well as service to the university and scholarly communities. Collaboration in research and teaching is encouraged with others in the Department, Faculty and University as well as in research networks such as the Quebec Centre for Biodiversity Science.

The Department of Natural Resource Sciences is a community of researchers in wildlife and fisheries biology, forest and landscape ecology, entomology, microbiology, soil science, ecotoxicology, economics and natural resource policy. The position will be a key component of the research and graduate teaching in wildlife biology and will complement our current strengths in mammalogy, ornithology, and landscape ecology. We are committed to excellent teaching in several environmentally-oriented undergraduate majors and specializations offered through the Faculty and the McGill School of Environment.

McGill's Faculty of Agricultural and Environmental Sciences is located on the Macdonald Campus, 30 km from the city of Montreal. The Campus comprises 650 hectares of farm and forested lands, commercial and research animal facilities, experimental field stations and state-of-the-art student learning facilities.

**Qualifications:** The successful applicant will hold a Ph.D. in a relevant field, such as biology or environmental science.

Appointment is expected to be at the rank of Assistant Professor, but appointment at a higher rank is possible under exceptional circumstances.

Applications should include a cover letter, a current curriculum vitae, a research statement that includes achievements and future plans, up to three publications in PDF format, a summary of teaching interests and experience, and letters from three professional references who can evaluate their candidacy for a tenure-track position. The position start date is on or after August 1, 2017.

For more information about the Department and Faculty of Agricultural and Environmental Sciences, visit our web sites at: <http://www.mcgill.ca/nrs/department-natural-resource-sciences>; [www.mcgill.ca/macdonald](http://www.mcgill.ca/macdonald).

Inquiries about this position may be sent to the Chair of the Department, Dr. Brian Driscoll,  
brian.driscoll@mcgill.ca

Review of applications will begin on March 29, 2017 and will continue until the position is filled.
