Questions about interpreting a BEAST analysis results

- Which of the two partitions (ITS or trnL) give the estimate for MRCA-time we should trust the most ? (Tip: ESS)

- Why do MutationRate have no standard error of the mean and etc?

- What is the unit for MutationRate? (Disclosure: I don't know yet the answer…)

- Compare the Trace for ClockRate and for mrcatime(OldClade). Which one looks better?
